

Stinova Digital Signage Software Solutions and Services at CeBIT

Stinova to announce major new solutions at CeBIT (March 2 - 6) in hall, 2 stand E44 and as well as three partner stands, a number of new Digital Signage products and services.

Visumotion - Hall 9, Stand B47 - Demonstrating their next generation of 3D panels together with Stinova's Digital Media Player Software for 3D Signage applications. 3D view without glasses improves the visual impact of digital compared to 2D.

Microstar International (MSI) - Hall 17, Stand C38 - Displaying the Stinova DMX4 Server and Player Software for Digital Signage on all of their PC based embedded hardware players.

Norco - Hall 17, Stand C01-10 - introduces the new embedded hardware player BIS-6592GM together with Stinova's DMX4 Appliance Server Software best suited for advanced Digital Signage applications.

Stinova - Hall 2, Stand E44 - as well as displaying the Visumotion 3D Screen, We will be showing our own new Desktop Signage Player for Windows. Release your company Signage from a limited number of screens around the office instead have direct to staff media rich managed content appear on every desktop without impeding on the usability.

New service release is the enrichment of the WEB site with Stinova's WEB-based Digital Media Composer by using the Composer Authoring tool. This allows assigning some areas on your home page with dynamic news and information with simple drag & drop and WYSIWYG experience for Text, RSS, Images, Videos and Flash. In our first release we will support Joomla as a WEB CMS System.

Stinova is also introducing a new sales tool in form of a portable Digital Wearable TAG, wear Company Signage on your lapel. It allows carrying way more than just your name because it can transport very effectively all of your messages in your sales room or at the exhibition floor with astonishing animations. Stinova created a service portal that allows you to build your own images or video loops dedicated for the name TAG via the portal www.MyTAG.tv.

Enrich your digital signage content with a Stinova weather forecast service for more than 7 million locations worldwide. When you subscribe to this service you can select between several nicely animated weather templates or you build your own layout and add it to your digital signage program.

Stinova introduces its s-cube TV Gateway as Software-only solution. This allows you building your low cost live TV streamer by using a low cost Atom (ION) platform and USB tuner devices for DVB-S (satellite) or DVB-T (terrestrial) Free-to-air. The digital TV will be distributed to your local network via a multicast stream that can be easily integrated in your digital signage playlists. The s-cube TV Gateway software is based on an embedded Linux and can be installed on any bootable USB stick. The remote management of the s-cube software can be done thru any web browser.
